ROI 4: Baltic Sea (Purple team)

Description

The Baltic Sea is a semi-enclosed, shallow marine system bordered by nine countries and home to over 85 million people. It underpins regional fisheries, shipping, and tourism. However, it faces severe pressures from eutrophication, pollution, and climate change, making sustainable management critical for human and environmental health, food security, recreation, and regional economies. Optically, the Baltic sea is complex with both natural and anthropogenic inputs interacting with seasonal stratification.

Region

Date start	2025-07-10T00:00:00.000Z
Date end	2025-07-11T00:00:00.000Z
West	19.00
East	20.50
South	58.00
North	59.50
