ROI 6: Rio de la Plata (White team)

Description

The Río de la Plata, one of the world's widest estuaries, forms a vital link between Argentina and Uruguay and drains a basin covering over 3 million km². It supports major cities like Buenos Aires and Montevideo, serving as a hub for shipping, fisheries, and tourism, while providing freshwater and sustaining biodiversity. The estuary underpins regional economies but faces challenges from pollution, sedimentation, and climate change, making sustainable management critical. Optically, the Río de la Plata is among the most turbid estuaries globally.

Region

Date start	2025-01-09T00:00:00.000Z
Date end	2025-01-10T00:00:00.000Z
West	-57.00
East	-55.00
South	-36.00
North	-34.50
